Application No.: 10/658,337

Art Unit: 3643

Attorney Docket No. 19080.04

Confirmation No. 1868

IN THE CLAIMS

Claim 1. (Currently Amended) A metal lip jig rig, comprising:

a metal teardrop-shaped lip, said lip having a top bulbous first portion having defined therein a first

aperture and a bottom tapered second portion having defined therein a second aperture, the lip being

configured to help the metal lip jig rig sink when placed in water;

a punched out strap that is used to receive integrally formed in the first portion of said lip for

receiving a fishing line, said punched out strap having two opposite ends, each of the ends being integrally

attached to the lip;

a first aperture on the top portion of the metal lip to potentially rivet a first hook and a spinner wire

to the metal lip jig rig;

a second aperture on the bottom-portion of the metal lip to potentially receive and hold a second

hook;

a fish hook having a shank extending from the second portion of the lip adjacent the second

aperture, said hook being secured to the lip by molded material encasing the shank and second portion of

the lip; and

a plurality of spurs on the area provided between the bottom portion and the top <u>pair of bait</u>

holders extending laterally from the molded material disposed on the second portion of the lip that can be

wrapped around a third hook to potentially receive and hold the third hook.
